

MACHINE AUGMENTED INTELLIGENCE & AUTONOMY

AI-First Security Technology Integrator

Turning cameras into intelligence.
Data into decisions.
Security into autonomous operations.

MEDIA KIT · 2026

MAP is now MAIA.

For years, MAP — Monitoring and Asset Protection — safeguarded people, properties and assets across Africa. As threats evolved and data multiplied, we evolved with them. Today, MAP has become MAIA: an AI-First Security Technology Integrator that combines human expertise with machine intelligence to deliver autonomous, adaptive and smarter security.

MAP — Where we came from

Monitoring and Asset Protection — trusted guardianship built on people, cameras and unwavering commitment. MAP continues as the legacy implementation arm beneath MAIA.

MAIA — Where we're going

A global AI-First Security Technology Integrator. We integrate AI, data and automation to predict, prevent and protect across smart cities, retail, airports, hospitality, logistics, mining and critical infrastructure.

From Protection
to Empowerment

Evolving Security. Empowering Intelligence.

EVOLVING SECURITY. EMPOWERING INTELLIGENCE.

TO

WHY WE CHANGED OUR NAME

The world of security has evolved. So have we.

MAP – Monitoring and Asset Protection has been at the core of who we are – protecting people, properties and assets through technology, expertise and unwavering commitment.

MAIA – AI-First Security Technology Integrator represents our evolution into an intelligence-led future. We are no longer just monitoring – we are integrating AI, data and automation to predict, prevent and protect.

WHAT MAIA MEANS

MAIA stands for
Machine Augmented Intelligence & Autonomy

A name that reflects our mission to combine human expertise with machine intelligence to deliver autonomous, adaptive and smarter security solutions.

WHAT WE DELIVER

AI-POWERED
VIDEO
ANALYTICS

INTEGRATED
SECURITY
SYSTEMS

INTELLIGENCE
& DATA
INSIGHTS

AUTOMATION
& SMART
WORKFLOWS

SECURE
CONNECTIVITY
& CLOUD

24/7 INTELLIGENT
MONITORING
& RESPONSE

SAME COMMITMENT. NEW INTELLIGENCE. GREATER IMPACT.

Stronger technology. Smarter solutions. Safer tomorrows.

What MAIA stands for.

OUR MISSION

Turn every camera, sensor and system into intelligence.

We integrate the world's best security, AI and automation technologies into one intelligent operating layer.

OUR VISION

A world where security is autonomous and adaptive.

The intelligent operating system for the physical world — safer, smarter, more autonomous every day.

THE FIVE PILLARS OF MAIA

Perceive

Unify every camera, sensor and system into one live feed of reality.

Understand

OMNISCIENT AI learns normal, surfaces anomalies and adds context.

Predict

Forecast operational and security incidents before they happen.

Act

Automate response — humans stay where judgement matters.

Empower

Turn raw feeds into board-ready operational intelligence.

THE BRAIN OF MAIA

OMNISCIENT AI

The brain. The intelligence. The autonomy.

OMNISCIENT AI sits above every camera, sensor and system. It transforms disconnected infrastructure into one intelligent operating platform — learning continuously so organisations can understand why incidents happen and how to prevent them.

WHAT AUTONOMOUS OPERATIONS MEANS FOR YOU

Fewer false alarms

AI filters noise so operators focus only on real events.

Faster response

Automated workflows trigger the right action in seconds.

Predictive prevention

Behavioural models flag risk before incidents occur.

Operational insight

Security data becomes business intelligence.

Lower cost per site

One platform replaces stacks of siloed systems.

Scale without headcount

Autonomy expands coverage without expanding teams.

Vendor-neutral. Solution-driven.

MAIA integrates the world's leading platforms — Dragonfruit AI, RAD Security, Zygal and more — unified under OMNISCIENT AI.

COMPUTER VISION

Dragonfruit AI

AUTONOMOUS RESPONSE
